

ARCHITECTURE:

The framework of the glucosio app is split between the tests and the functional code. Within the Application "glucosio-android" is "app"
"gradle/wrapper" "wear" and various read files and scripts.
"wear": determines how data is output to wearable devices
"gradle/wrapper": wraps the application
"app": holds the files that make up the application itself

HOW TO RUN:

1. Download repository
2. Run python script from command line using command:
(linux/mac)
python ~/.../Steve/TestAutomation/scripts/runALLTests.py
(windows)
C:\...\Steve\TestAutomation\scripts\runALLTests.py
3. An HTML report will be saved within Steve/TestAutomation/reports as reports.html and opened
